PROFESSIONAL SUMMARY

Results-driven **Flutter Developer** with experience building, publishing, and maintaining production mobile apps on Apple App Store & Google Play Store. Proficient in Clean Architecture, Provider state management, Flame Engine (2D game dev), RESTful APIs, WebSockets, and Firebase. Skilled in background location tracking and push notification systems.

TECHNICAL SKILLS

Languages & Core:	Dart, SQL, C/C++, HTML/CSS, JavaScript / Node.js
Frameworks & Engines:	Flutter SDK, Flame Engine, Provider, Material Design, Cupertino UI
Architecture & APIs:	Clean Architecture, MVVM, RESTful APIs, WebSockets, WebRTC, OOP
Backend & Services:	Firebase (Firestore, Realtime DB, Auth), Node.js, MySQL, FCM, OneSignal
Developer Tools:	Git, GitHub, Android Studio, VS Code, Postman, Google Play & App Store Connect

PROFESSIONAL EXPERIENCE

Flutter Developer <i>CofCode</i>	June 2025 – Present
- Architected and deployed production Flutter applications for iOS and Android with modular code structure. - Integrated RESTful APIs and real-time data flows using Provider for scalable state management. - Managed app store deployments, bug fixes, performance optimization, and updates on Play Store & App Store.	
Associate Flutter Developer <i>CFITS</i>	Oct 2024 – April 2025
Contributed to client Flutter apps with focus on UI refinement, REST API handling, and Provider state management.	
Flutter Intern (Remote) <i>DevelopersHub Corporation</i>	Sep 2024 – Oct 2024
Developed cross-platform Flutter modules, refactoring legacy components to boost application stability.	

KEY PROJECTS & PUBLISHED APPS

WatchLine Automated Personal Safety Check-In App (<i>Flutter, Background Services, Email API, Provider</i>)	June 2026 – July 2026
- Engineered a safety check-in app with customizable timers (1–3+ days) dispatches background emergency notifications. - Integrated automated background email alerts to designated emergency contacts if user fails to check in before timer expiry.	
Rung King (Hidden Rung) 2D Multiplayer Card Game (<i>Flutter, Flame Engine, WebSockets, Dart</i>)	Feb 2026 – May 2026
- Developed a 2D card game using Flame Engine featuring real-time multiplayer via WebSockets & smart AI opponents. - Built trick-taking gameplay features including trump selection (Rung), 2v2 team play, and coin betting mechanics.	
JobSnap On-Demand Job Marketplace (<i>Flutter, Firebase, Node.js, WebSockets, OneSignal</i>)	June 2025 – Nov 2025
Live Apps: App Store • Play Store	
- Published cross-platform marketplace app connecting service providers and clients for real-time task bidding. - Implemented 3-tier role-based access control (User, Provider, Agent) and real-time messaging via WebSockets.	
RideHoppy Ride-Sharing Platform (<i>Flutter, Firebase, Dart, Node.js, Maps API</i>)	July 2025 – Oct 2025
Live Apps: App Store (Rider) • App Store (Driver)	
- Built dual ride-sharing apps featuring real-time vehicle tracking using Google Maps API and Firebase. - Developed fare estimation, route navigation, live status updates, in-app chat, and wallet balance management.	
B2B Cabs Corporate Transportation System (<i>Flutter, Firebase, Maps API, FCM, OneSignal</i>)	Mar 2025 – May 2025
Driver App: App Store • Play Store Company App: App Store • Play Store	
- Engineered dual mobile apps (Company & Driver) to automate employee transit with Foreground Services tracking. - Integrated FCM & OneSignal push notifications for instant driver dispatch updates and live fleet tracking.	

EDUCATION

University of Central Punjab <i>Bachelor of Science in Software Engineering</i>	2021 – 2025
Government College University (GCU) <i>ICS - Intermediate</i>	2018 – 2020
